

NFSMELL / WEEK 1 EDITION

2026 FANTASY DRAFT + WEEK 1 CHEAT SHEET

A cross-position redraft value board built from fantasy points, replacement scarcity, role, coaching, schedule, workload, and visible downside/upside scenarios - plus an early Week 1 forecast for every game.

DEFAULT FORMAT
12-team / Half PPR / 1QB / Redraft

LIVE RELEASE
v192-week1-receipts-x-intent-20260905

MODEL STACK
player-forecast-v41 / team-strength-v35

DRAFT CONTRACT

Active-game PPG x role-qualified expected fantasy-active games + the published walk-forward forecast-error adjustment equals the season median. Player OVR earns zero draft-value points.

CMC RECEIPT

McCaffrey is RB5 on median half-PPR points. Managed workload lowers volume and widens downside; it no longer creates a hidden mechanical rank.

MARKET LIMIT

No permitted attributable ADP feed is loaded. Reach, bargain, and expected-round claims are withheld rather than guessed.

BETTING CONTRACT

Winner probability, spread disagreement, and moneyline disagreement are separate. Every formal Week 1 market call remains PASS.

Player snapshot generated 2026-09-04T23:06:00.818438+00:00; fantasy ledger frozen 2026-09-05T13:02:51.264Z; game refresh generated 2026-09-04T23:10:47.457Z. No ranking or pick is a guarantee. Check final inactive lists and outdoor weather before lock.

DRAFT PLAN

Use the board without pretending it knows ADP

The board answers who projects to create the most format-specific value above replacement. It cannot answer whether a player is cheap at your pick until an attributable market-price feed is licensed and loaded.

PICK 1.01-1.04

Take the best remaining Tier 1 cross-position value. In 1QB, do not spend this pick on a quarterback merely because he is the best real-life passer.

PICK 1.05-1.12

Compare VORP and P20 downside. Break close calls with role certainty and lineup scarcity, not a one-point OVR difference.

MIDDLE ROUNDS

Track positional replacement cliffs. In superflex, use the separate board; in 1QB, keep taking scarce RB/WR/TE value while QB replacement remains deep.

LATE ROUNDS

Buy verified routes, touches, and contingency access. Draft D/ST and kicker last; do not turn an opportunity signal into a fake sleeper claim without market cost.

RB FOUNDATION

- 1. Jahmyr Gibbs (DET)
- 2. Bijan Robinson (ATL)
- 3. Jonathan Taylor (IND)
- 4. Derrick Henry (BAL)
- 5. Christian McCaffrey (SF) [REVIEW]
- 6. James Cook III (BUF)
- 7. De'Von Achane (MIA)
- 8. Kyren Williams (LAR)

WR FOUNDATION

- 1. Puka Nacua (LAR)
- 2. Ja'Marr Chase (CIN)
- 3. Amon-Ra St. Brown (DET)
- 4. Jaxon Smith-Njigba (SEA)
- 5. George Pickens (DAL)
- 6. Davante Adams (LAR)
- 7. CeeDee Lamb (DAL)
- 8. Nico Collins (HOU)

QB CORE

- 1. Josh Allen (BUF)
- 2. Jalen Hurts (PHI)
- 3. Matthew Stafford (LAR)
- 4. Jared Goff (DET)
- 5. Drake Maye (NE)
- 6. Bo Nix (DEN)
- 7. Caleb Williams (CHI)
- 8. Lamar Jackson (BAL)

TE CORE

- 1. Trey McBride (ARI) [REVIEW]
- 2. George Kittle (SF)
- 3. Brock Bowers (LV) [REVIEW]
- 4. Travis Kelce (KC)
- 5. Tyler Warren (IND)
- 6. Kyle Pitts Sr. (ATL)
- 7. Harold Fannin Jr. (CLE) [REVIEW]
- 8. Sam LaPorta (DET) [REVIEW]

REPLACEMENT-CUTOFF SENSITIVITY

STRUCTURE	REPLACEMENT	TOP-15 MIX	OVERLAP	NO. 1
WR-heavy	QB12 / RB28 / WR48 / TE12	10 RB / 4 WR / 1 QB / 0 TE	15/15 vs balanced	Jahmyr Gibbs
Balanced	QB12 / RB30 / WR42 / TE12	10 RB / 4 WR / 1 QB / 0 TE	15/15 vs balanced	Jahmyr Gibbs
RB-heavy	QB12 / RB36 / WR36 / TE12	11 RB / 4 WR / 0 QB / 0 TE	14/15 vs balanced	Jahmyr Gibbs
Flex-adjusted	QB12 / RB28 / WR43 / TE13	10 RB / 4 WR / 1 QB / 0 TE	15/15 vs balanced	Jahmyr Gibbs

The full half-PPR board was rebuilt under all four structures. 14 players remain in every top 15. This is structural sensitivity, not ADP or a calibrated confidence interval.

WHEN TWO PLAYERS ARE CLOSE

Take the clearer role, healthier player, and better schedule. Exact rank is less important than tier and evidence.

WHEN THE BOARD LOOKS WEIRD

Do not auto-correct to reputation. First check ROLE, Q, and MGT tags, then decide whether the uncertainty is worth the upside.

WHEN YOUR LEAGUE CHANGES

Superflex: QB rises. Full PPR: target earners rise. Standard: touchdown and rushing volume rises. TE premium requires a separate bump.

CROSS-POSITION BOARD

Top 50 by half-PPR value above replacement

Default: 12 teams, half PPR, 1QB, redraft. SEASON = ACTIVE/G x role-qualified expected fantasy-active games + the published walk-forward forecast-error adjustment. VORP compares each player with QB12, RB30, WR42, or TE12; VONA is withheld without live draft state.

Acquisition cost is not in this order. Use live draft price separately; NFSMELL will not label a reach or bargain until a permitted attributable ADP source is loaded.

POSITION BOARD

Quarterbacks and tight ends

Position order follows median half-PPR points. Rushing yards and rushing touchdowns score directly for QBs. McBride is TE1 even after Mike LaFleur's validated TE-use prior lowers his opportunity; that effect changes fantasy production, never player OVR.

QUARTERBACKS

#	PLAYER	TM	ROLE	MED	ACTIV E/G	P20-P80	VORP
1	Josh Allen 15.9 fantasy-active games	BUF	QB	334	23.9	246-402	+101

Use the median and P20-P80 scenarios over tiny rank gaps. A one-point VORP difference is not strong evidence that one receiver must be drafted before another.

FORMAT PIVOTS

Move the right archetypes, not the whole board

The live model supports standard, half PPR, full PPR, 1QB, and superflex. These are the most useful directional changes from the default half-PPR board.

FULL PPR BUMP

- Dalton Schultz (TE12, +13)
- Keenan Allen (WR22, +11)
- Jake Ferguson (TE9, +11)
- Wan'Dale Robinson (WR26, +10)
- Khalil Shakir (WR37, +9)
- Travis Kelce (TE4, +8)
- Jerry Jeudy (WR50, +8)
- Trey McBride (TE1, +7)

STANDARD / TD BUMP

- Tucker Kraft (TE4, +23)
- Jacory Croskey-Merritt (RB26, +20)
- Jalen McMillan (WR42, +12)
- Alec Pierce (WR22, +11)
- Dallas Goedert (TE7, +11)
- Christian Watson (WR39, +11)
- Mark Andrews (TE12, +11)
- AJ Barner (TE17, +11)

SUPERFLEX QB PRIORITY

- Josh Allen (overall 3)
- Jalen Hurts (overall 16)
- Matthew Stafford (overall 17)
- Jared Goff (overall 18)
- Drake Maye (overall 19)
- Bo Nix (overall 20)
- Caleb Williams (overall 21)
- Lamar Jackson (overall 25)
- Patrick Mahomes (overall 26)
- Baker Mayfield (overall 28)

OPPORTUNITY WATCH - NOT ADP-BASED SLEEPER CLAIMS

PLAYER	CURRENT PATH	OPP SCORE	ROLE CONF	EVIDENCE
George Holani SEA RB	Lead-back lineup role	71.7	MEDIUM	65%
AJ Barner SEA TE	Starting tight end	70.0	HIGH	85%
Cam Skattebo NYG RB	Lead-back lineup role	69.6	HIGH	85%
MarShawn Lloyd GB RB	Lead-back lineup role	69.5	MEDIUM	65%
Michael Wilson ARI WR	WR2 lineup role	69.3	HIGH	85%
Omarion Hampton LAC RB	Lead-back lineup role	68.6	HIGH	85%
De’Zhaun Stribling SF WR	WR3 lineup role	68.4	MEDIUM	65%
Tyler Warren IND TE	Starting tight end	67.4	HIGH	85%
Blake Corum LAR RB	Primary reserve back	67.3	HIGH	85%
TreVeyon Henderson NE RB	Primary reserve back	67.2	HIGH	85%
Jalen Coker CAR WR	WR2 lineup role	67.2	HIGH	85%
Tetairoa McMillan CAR WR	WR1 lineup role	67.0	HIGH	85%

Signal coverage is evidence completeness, not breakout probability. NFSMELL does not currently use an attributable ADP feed, so these are opportunity paths rather than claims that the market is asleep.

DIAGNOSTIC AUDIT

The rankings that test whether the model understands football

These receipts separate real-life OVR, active-game fantasy scoring, season outcome, roster assignment, opportunity, coaching, current health, and role-qualified participation history. Every season median is reproducible from the displayed arithmetic.

PLAYER	RANKS	PRODUCTION	ROLE / OPPORTUNITY	COACHING / RISK
Saquon Barkley PHI / RB	RB9 median RB9 weekly	15.4 active/g x 15.7 fantasy-active g = 242.3 -14.5 forecast error = 227.9 season 175-261 P20-P80	18.5 carries/g; 3.1 targets/g; Elevated TD history	CURRENT Healthy; LOW PARTICIPATION RISK; 2025: 16g IN / 2024: 16g IN / 2023: 14g IN; medical probabilities WITHHELD: injury cannot be isolated from role loss; caller Sean Mannion +0.0%
Jayden Daniels WAS / QB	QB22 median QB15 weekly	17.6 active/g x 12.1 fantasy-active g = 213.1 -46.0 forecast error = 167.2 season 59-238 P20-P80	27.3 pass att/g; 8.4 rush/g; 0.30 rush TD/g	CURRENT Healthy; HIGH PARTICIPATION RISK; 2025: 7g IN / 2024: 17g IN; medical probabilities WITHHELD: injury cannot be isolated from role loss; caller David Blough +0.0%
Joe Burrow CIN / QB	QB20 median QB9 weekly	18.4 active/g x 12.3 fantasy-active g = 226.1 -46.0 forecast error = 180.1 season 79-249 P20-P80	34.2 pass att/g; 2.1 rush/g; 0.00 rush TD/g	CURRENT Healthy; HIGH PARTICIPATION RISK; 2025: 8g IN / 2024: 17g IN / 2023: 10g IN; medical probabilities WITHHELD: injury cannot be isolated from role loss; caller Zac Taylor +0.0%
Brock Purdy SF / QB	QB15 median QB3 weekly	19.8 active/g x 12.7 fantasy-active g = 251.5 -46.0 forecast error = 205.6 season 106-274 P20-P80	30.9 pass att/g; 3.7 rush/g; 0.30 rush TD/g	CURRENT Healthy; HIGH PARTICIPATION RISK; 2025: 9g IN / 2024: 15g IN / 2023: 16g IN; medical probabilities WITHHELD: injury cannot be isolated from role loss; caller Kyle Shanahan +0.0%
Brock Bowers LV / TE	TE3 median TE3 weekly	11.2 active/g x 14.0 fantasy-active g = 157.0 -12.8 forecast error = 144.1 season 112-170 P20-P80	7.6 targets/g; 5.7 catches/g; Elevated TD history	CURRENT Healthy; ELEVATED PARTICIPATION RISK; 2025: 12g IN / 2024: 17g IN; medical probabilities WITHHELD: injury cannot be isolated from role loss; caller Klint Kubiak -3.4%
Trey McBride ARI / TE	TE1 median TE2 weekly	12.5 active/g x 16.3 fantasy-active g = 204.4 -12.8 forecast error = 191.6 season 162-216 P20-P80	9.4 targets/g; 7.0 catches/g; Elevated TD history	CURRENT Healthy; LOW PARTICIPATION RISK; 2025: 17g IN / 2024: 16g IN / 2023: 17g IN; medical probabilities WITHHELD: injury cannot be isolated from role loss; caller Mike LaFleur -5.3%

QB residual receipt: -46.0 is the position-and-scoring-wide half-PPR median from 251 walk-forward player-seasons across 2022-2025. It applies consistently to comparable QB forecasts; it is not a player-specific injury adjustment. Season MAE is 99.4 for the rate-only forecast, 78.5 after role-qualified participation, and 67.9 in the pooled median-adjusted diagnostic. The final number reuses the residual cohort and is not a separate nested holdout.

SAQUON CORRECTION

The old RB23 was an OVR-like context index presented as draft order. The new board uses half-PPR production and replacement value directly; current median rank is RB9.

DANIELS CORRECTION

Rushing yards and touchdowns score directly. Daniels is healthy now; any lower season rank is an explicit role-qualified participation claim. Medical probability is withheld rather than inferred from a confounded cohort.

BOWERS / MCBRIDE

Validated play-caller TE usage changes fantasy opportunity only. McBride's LaFleur adjustment is applied and disclosed; the current medians place him TE1 and Bowers TE3.

Joe Burrow and Brock Purdy are included because a healthy current status can coexist with a lower role-qualified participation estimate. Backup-only seasons are excluded. Player-specific medical probabilities are withheld because the available history cannot separate injury from benching, role loss, retirement, or roster eligibility. Verified route participation, two-minute share, red-zone touches, and goal-line carries remain unavailable as repeated point-in-time observations.

WEEK 1 FANTASY

Start cases and risk checks versus a real fantasy baseline

Default: 12-team half PPR, 1QB, redraft. WK1 is the Week 1 position rank; ACTIVE is the season active-game fantasy rank, not the participation-adjusted season rank. Specialists are excluded because they have no comparable season baseline. Planning ranges are not calibrated percentiles.

START CASES VS ACTIVE RANK						
PLAYER	POS	VS	WK1 / ACTIVE	MOVE	PTS	RANGE
Bucky Irving (TB)	RB	CIN	15 / 16	+1	15.8	11.8-19.8
Breece Hall (NYJ)	RB	TEN	16 / 18	+2	15.5	11.4-19.6
Wan'Dale Robinson (TEN)	WR	NYJ	22 / 42	+20	10.7	6.8-14.6
Emeka Egbuka (TB)	WR	CIN	25 / 36	+11	10.5	6.4-14.6
Kyler Murray (MIN)	QB	GB	8 / 18	+10	20.0	16.0-24.0
Cade Otton (TB)	TE	CIN	12 / 18	+6	8.3	4.6-12.0
Baker Mayfield (TB)	QB	CIN	12 / 16	+4	19.2	15.3-23.1
Juwan Johnson (NO)	TE	DET	9 / 14	+5	8.6	5.0-12.2

RISK CHECKS VS ACTIVE RANK						
PLAYER	POS	VS	WK1 / ACTIVE	MOVE	PTS	RANGE
DJ Moore (BUF)	WR	HOU	48 / 28	-20	8.0	4.3-11.7
Mike Evans (SF)	WR	LAR	39 / 20	-19	8.9	5.3-12.5
Drake Maye (NE)	QB	SEA	22 / 6	-16	15.9	11.8-20.0
Brock Purdy (SF)	QB	LAR	14 / 3	-11	18.5	14.4-22.6
AJ Barner (SEA)	TE	NE	27 / 19	-8	5.6	1.9-9.3
Mark Andrews (BAL)	TE	IND	24 / 15	-9	6.2	2.5-9.9
James Cook III (BUF)	RB	HOU	11 / 7	-4	17.4	13.4-21.4
Christian McCaffrey (SF)	RB	LAR	5 / 2	-3	20.1	15.2-25.0

ACTIVE WORKLOAD RECEIPT	WHAT TO DO
Christian McCaffrey - 90% central opportunity baseline, 80-100% range. Ten percent of the frozen historical-volume baseline is held as unresolved 49ers backfield work rather than credited back to McCaffrey.	Draft at a workload-aware price, not at his old touch ceiling. Pair the roster with backfield upside and recheck the final inactive list before Week 1 lock.

BEFORE THURSDAY

Confirm role changes, late transactions, and managed-workload updates.

BEFORE SUNDAY

Confirm every questionable tag, inactive list, and backup beneficiary.

OUTDOOR GAMES

Weather can still move. Indoor games never wait for a forecast.

EARLY GAME PREDICTIONS

Week 1 - first eight games

Straight-up winner probability, spread disagreement, and no-vig moneyline value direction are separate outputs. Every card names the diagnostic value side and its review state; none is an official bet. Every formal market gate remains PASS.

NE @ SEA

PICK: SEA - LEAN

NE 21.0 - SEA 24.5

SPREAD GAP: SEA -3.5 by 0.1 pts

Seattle gets the home nod and the steadier two-way profile; New England's passing strength keeps it close.

How to read it: LIKELY WINNER is the straight-up forecast. SPREAD VALUE names the side helped by the model margin relative to the posted line. Spread gaps use unrounded model scores; displayed team scores are rounded. ML VALUE names the side with the larger model-minus-no-vig probability. MANUAL REVIEW, QUARANTINE, and PRESUMED ERROR are rejection states, not confidence badges. Closing-line value cannot exist until a closing price exists.

MODEL RECEIPT

What is inside this PDF

This sheet is intentionally explicit about model scope so an early projection is never mistaken for settled truth.

HONEST LIMITS

- The season board forecasts production and value over replacement. It is not an ADP board; acquisition cost, reach, bargain, and expected-round claims remain withheld.

- Every position has its own role, coaching, schedule, injury, and workload contract. Only validated positional effects move central production; player OVR and team OVR receive zero points from the draft board.

- Active-game PPG, role-qualified expected fantasy-active games, participation-baseline points, and walk-forward forecast-error adjustment are separate. Current health is shown independently. Player-specific medical probabilities are withheld; season P20/median/P80 are retrospective scenarios, not medical probabilities.

- Verified route participation, two-minute share, red-zone touches, and goal-line carries are not yet available as repeated point-in-time observations. Historical opportunity is shown instead of invented data.

- Game cards show source, books, capture time, no-vig probability, diagnostic value side, and model-market gap review state. Outdoor details are labeled not itemized when absent. Indoor games require no weather wait.

- All formal Week 1 betting calls remain PASS. Closing-line value and settled performance do not exist before close and settlement; winner forecasts are not gambling instructions.
